

KALYVES, CRETE

196 Kalyves

PRE-CONSTRUCTION

THE PROJECT

196 Kalyves takes its name literally: a sanctuary 196 steps from the sand, where the Aegean meets the Lefka Ori mountains. Fifty-eight residences, studio to penthouse, are built from authentic Cretan sandstone and Travertine marble, with floor-to-ceiling glazing that turns the sea into part of the interior.

Conceived as a wellness destination as much as a residence: dual infinity pools, a yoga studio, gym, and spa are shared across the community, with every home delivered curated and operationally ready.

DESIGN & CRAFTSMANSHIP

Developed by Cretan Coast, in partnership with Alef Beta Properties – architecture by Nantia, construction delivered with Alpha Omega.
