

TEL AVIV

Nachmani 9

SOLD OUT

THE PROJECT

Nachmani 9 occupies a corner site in the heart of Tel Aviv. A white cube cut through with dramatic black-framed openings and cantilevered balconies, visible from both streets it fronts. Ten apartments across four floors, each with the same clarity of material – white render, black steel, glass.

The building sold out ahead of completion, a result attributed to restraint as much as ambition: nothing was added to the facade that didn't need to be there.

DESIGN & CRAFTSMANSHIP

Designed by RNA Design Studio – a single material idea, white volume against black openings, carried without compromise.
